KERRI JENSEN

435-400-0811 | kerrijensen13@gmail.com | linkedin.com/in/kerri-jensen | github.com/kerrijensen

Computer Science senior with experience developing React/FastAPIs and Django/PostgreSQL applications, supporting university IT systems, and building full-stack applications. Background spans backend development, databases, troubleshooting, and technical communication.

TECHNICAL SKILLS

Languages: Python, Java, C#, SQL, JavaScript, HTML/CSS
Backend & Data: Django, Django REST Framework, PostgreSQL, REST APIs
Tools & Platforms: Git, GitHub, Docker, Unity, SSH
Operating Systems: Linux, Windows, macOS
Libraries: OpenCV, scikit-learn, NumPy

EXPERIENCE

Southern Utah University Cedar City, UT
Student Software Developer Apr 2026 - Present

- Develop and maintain backend features for university applications using Python, Django, PostgreSQL, and REST APIs within an existing team codebase.
- Implement database migrations, role-based permissions, search and content-management features, and automated tests.
- Collaborate through Git/GitHub pull requests and code review while working in Docker-based development environments and remote Linux systems via SSH.

IT Help Desk Technician Aug 2025 - Aug 2026

- Resolved 30+ weekly support requests from students and faculty involving hardware, software, account access, authentication, networking, and device issues.
- Diagnosed unfamiliar technical problems, managed user accounts, and explained solutions clearly to non-technical users.

AmeriCorps STEM Teaching Assistant – SUU PREP May 2025 - Jul 2025

- Co-developed and delivered hands-on STEM curriculum in logic, engineering, robotics, and problem solving for 20+ middle-school students.

Executive Council, Fellow – Michael O. Leavitt Center for Politics and Public Service Feb 2023 - Present

- Lead service and marketing committees and coordinate campus events with student organizations, university leadership, and community partners.

PROJECTS

Coffee Corner | Python, Django, PostgreSQL, Google Maps APIs

- Build and deploy a full-stack Django web application for discovering coffee shops and managing user accounts, reviews, favorites, and personal journal entries.
- Integrate Google Maps and Places APIs for location-based search and develop database-backed workflows for persistent user data.

Smart Parking Spot Detection | Python, OpenCV, YOLO

- Developed a computer-vision pipeline using OpenCV and YOLO to detect parking-space occupancy and explored Random Forest models for parking-usage analysis and forecasting; presented project at UCUR 2026.

Consent-Driven Proximity Interaction Framework | C#, Unity, VR/XR

- Collaborated on a six-person Unity VR capstone, integrating and testing a world-space consent interface and configuring UI interactions for XR controller input.

EDUCATION

Southern Utah University | Cedar City, UT
B.S. Computer Science | Apr 2027
